RE: COVID-19 Outreach & Partnership Coordinator

Dear Paul Wightman, Executive Director,

As one of the writers of the CHW curriculum for underserved populations in Utah, I love the work of the CHW. When we wrote this curriculum, it was based from our experiences, our hearts, the care and passion we had for the communities. The Tuesday's nights meant a lots to me. It brings us the joy and family togetherness. Because of this, I would love to continue and be part of the CHW journey.

Additionally, as a community leader who cares about the community, I have contributed and helped in the situation of the COVID-19 in our refugee communities. I have made more than 100 reusable masks to prevent the spread of COVID-19 among refugees' youth and families.

As a recent Master's of Public Health (MPH) graduate and community health outreach volunteer abroad, I conducted outreaches about the free circumcision services to the high-risk male populations in Nairobi's community clinics, recruited, and educated them on the risks of HIV/AIDS.

Throughout these experiences, coupled with my passion of making a difference in people's lives, I gained excellent communication and interpersonal skills, exceptional case management, problem-solve, and customer services. Additionally, I am multilingual in English, Dinka, and Arabic.

Thank you. I would appreciate the opportunity for any additional information pertaining to my qualifications at your convenient time.

Sincerely,

Suzie Akok, MPH
