

Utah Public Health Association | Outreach/Partner and Member/Communication Coordinator

June 30, 2020

To Selection Committee,

I hope you all consider me for the role as the one of the coordinator(s) due to my interests and passions to advocate for accessibility, representation, and inclusive outreach relating to our communities especially those that are underserved and underrepresented in the health/healthcare systems. Beside my involvement with OCA and past organizations, I am currently finishing a BS degree in Health, Society, and Policy and employed through the Department of Radiology at the University of Utah Hospital. Through the years, I have gained valuable experiences to navigate and engage through the basis of our local healthcare systems. Understanding and knowledge about analyzing root causes of interconnected social issues such as determinants with nutrition, race, gender, socio-economic status, education, social and physical environment, etc that affects the individual to overall populations. As well strong skills such as good communication, positivity, adaptability, and creativity for the individual to collaborative efforts to aid and fulfill the role as we continue through the trials with the pandemic of Covid-19. Thank you for reviewing and look forward to the decision for such an opportunity.

Best wishes,  
Anna Nguyen
